

Administering Office 365

Description

In this course you will learn how to plan the configuration of an Office 365 tenant including integration with existing user identities; plan, configure and manage core services; and report on key metrics.

Although this course and the associated labs are written for Office 365 with Windows 11, the skills taught will also be backwards compatible with Windows 10. This course is based on the features available in the Office 365 E3 license as these are the core features in Office 365 and Microsoft 365 plans.

Course Content

Module 1: Planning and Provisioning Office 365

- Overview of Office 365
- Core Services of Office 365
- Requirements for an Office 365 Tenant
