

SAFe® 6.0 Product Owner / Product Manager

Description

The SAFe® framework has become the benchmark for adopting an agile approach at scale. Designed to promote collaboration and consistency across teams, it is based on well-established agile methodologies such as Scrum, XP, and Kanban. This SAFe® training provides a deep understanding of the key roles of the Product Owner and Product Manager both essential to the success of any agile program.

Preparing for the SAFe® 6.0 Product Owner / Product Manager certification

In an environment where project complexity continues to grow, organizations are seeking professionals capable of maintaining alignment between product vision and business needs. The roles of Product Owner and Product Manager are therefore strategic. This training offers a practical and structured approach to mastering the principles of SAFe®, while applying them to real-world case studies inspired by actual business scenarios.
