Course Content

Module 1: DevOps and DevSecOps Module 2: The AWS Command Line Interface (AWS CLI) Module 3: Deployment strategies and developer tools Module 4: Infrastructure as Code (IaC) Module 5: AWS developer tools Module 6: Automated testing on AWS Module 7: Configuration management Module 8: Building AMIs and Amazon EC2 Systems Manager Module 9: Containers: Docker and Amazon ECS

Lab / Exercises

- This course allows you to test new skills and apply knowledge to your working environment through a variety of practical exercises

Documentation

- Digital courseware included

Exam

- This course prepares you to the exam: AWS Certified DevOps Engineer - Professional

Participant profiles

- System administrators
- Software developers

Prerequisites

- Working knowledge of one or more high-level programming languages (C#, Java, PHP, Ruby, Python, etc.)
- Intermediate knowledge of administering Linux or Windows systems at the command-line level
- Working experience with AWS using both the AWS Management Console and the AWS Command Line Interface (AWS CLI)

Objectives

- Use the principal concepts and practices behind the DevOps methodology
- Design and implement an infrastructure on AWS that supports one or more DevOps development projects
- Use AWS CloudFormation and AWS OpsWorks
- Set up Git on AWS and understand the array of options for enabling a Continuous Integration environment on AWS
- Use the core principles of Continuous Integration and Continuous Deployment

- Implement several common Continuous Deployment
- Distinguish between the array of application deployment technologies available on AWS
- Fine tune the applications you deliver on AWS for high performance
