

# Microsoft 365 Identity and Services

## Description

This course will teach you how to plan and implement Azure AD Connect, manage synchronized identities, and implement password management in Microsoft 365 using multifactor authentication and password management self service. This section ends with a complete overview of the implementation of an application and external access. You will learn how to add and manage applications in Azure Active Directory, including how to configure multi-tenant applications.

Training officially removed from the Microsoft catalog on 31.07.2023 and replaced by: [Microsoft 365 Administrator Essentials \(MS-102\)](#).
