

Configuration Manager – Supporting complex environments

Description

Il s'agit d'un cours pratique intensif. L'objectif de ce cours est de fournir des conseils sur la configuration et l'utilisation de Configuration Manager (ConfigMgr) dans des environnements Active Directory (AD) complexes.

Course Content

Module 1: Configuration Manager/Active Directory Integration in Complex Environments

- Review of Configuration Manager/Active Directory-integration Requirements in a Single-Domain Forest
- Integration Requirements in a Multi-domain Forest
- Integration Requirements in a Multi-forest Environment
- Troubleshooting Configuration Manager/Active Directory Integration

Module 2: Deploying and Supporting the Configuration Manager Client on Devices Outside the Site's Resident Forest

- Support for Clients in an Untrusted Domain or a Workgroup
- Site System Deployment in an Untrusted Domain
- Configuration Manager Site Installation in a Currently Untrusted Forest

Lab / Exercises

- Labs online

Documentation

- Digital courseware included

Participant profiles

- SCCM/MECM administrators
- SCCM/MECM senior administrators
- Solutions Architect

Prerequisites

- Experienced administrators who have worked with ConfigMgr for at least 1 year / completed the course 20703-1 / are problem solvers

Objectives

- After completing the workshop, you will be able to:
- Identify & resolve common problems in ConfigMgr/AD integration
- Configure ConfigMgr to support clients in untrusted forests
- Deploy & manage the ConfigMgr client on Windows devices in untrusted domains & workgroups
- Deploy ConfigMgr site systems in untrusted domains
- Extend a ConfigMgr hierarchy into a currently untrusted forest
