

SAFe® 6.0 Product Owner / Product Manager

Description

SAFe® is a framework designed to establish large-scale agility by leveraging the principles of agile methodologies such as Scrum, XP, and Kanban. It facilitates collaboration within a team working on a set of products. This training introduces the roles of the Product Owner and the Product Manager within a SAFe® context and prepares for the “SAFe® PO-PM” exam included in the course price.

Course Content

- Implement SAFe® in the Lean Enterprise
- Contribute to instilling a Lean-Agile mindset through the roles of the Product Owner and the Product Manager
- Collaborate with Lean Portfolio Management
- Continuously explore customer needs
- Execute the Program Increment
- Define the roles and responsibilities of the PO/PM
- Create a measurement plan for a PO/PM

Documentation

- Digital Courseware included

Exam

- Voucher Exam included
