

SAFe® 6.0 Scrum Master

Description

The SAFe® Scrum Master course helps you understand the key role of the Scrum Master within a large-scale agile organization. This training offers a practical approach to supporting agile teams in delivering business value. It focuses on the essential tactical skills needed to facilitate Scrum events, improve communication, and continuously enhance team performance.

Throughout the course, you will learn how to effectively coach SAFe® teams, streamline collaboration across different organizational levels, and support the planning and execution of Program Increments (PI). Through real-world scenarios and case studies, you will develop the facilitator mindset required to ensure the success of large-scale agile projects.

Become an effective Scrum Master in a SAFe® environment

Finally, this training prepares you for the official SAFe® Scrum Master (SSM) exam, included in the course price. You will be ready to earn an internationally recognized certification that validates your agile facilitation skills within SAFe® organizations. Enrolling in this course is a concrete step toward taking on a strategic role in enterprise-level agility.
