

# TOGAF® Training Program – Certified

## Description

This course covers the entire Level 2 curriculum and includes many examples that can be used in practice for implementing a uniform software architecture. The course allows you to take the exam “TOGAF® Level 2”. An exam voucher is included in the course price.

### Meta Fields

**Certifiant** : Array

**Contenu Cours** : Module 1: Application of ADM Phases to Enterprise Architecture Development Module 2: Applying Architecture Governance to Enterprise Architecture Development Module 3: Application of the architectural content framework Module 4: Applying Building Block Concepts Module 5: Application of the Stakeholder Management Technique Module 6: Applying content metamodels Module 7: Applying Recommended Techniques When Developing an Enterprise Architecture Module 8: Technical reference model and customization according to the needs of the company Module 9: Integrated Information Infrastructure Reference Model Module 10: Content of the main deliverables of the ADM cycle Module 11: Partitioning Enterprise Architectures to Meet the Specific Needs of an Organization Module 12: Architecture Repository Objectives Module 13: Application of iterations and different levels of architecture with ADM Module 14: Adapting the ADM System for More Security Module 15: SOA as Architecture Style Module 16: Roles of Architecture Maturity Models in Enterprise Architecture Development Module 17: Objectives of the Architectural Competency Framework and How to Apply it Within an Organization

**Lab Exercices** : Documentations and models on TOGAF® 9

**Documentation** :

- Digital courseware included

**Examen** :

- This training prepares you for the TOGAF® 9 Foundation exam included in the course price

**Profils Participants** :

- Business Activity Leaders
- MOA Team Members
- Managers and members of enterprise architecture programs
- Architects and urban planners

**Connaissances** : Participants must have followed or have the knowledge covered by the following training:

[TOGAF® Training Program - Foundation](#)

**Objectifs** :

- Content repository and its meta-model
- Architecture Development Method (ADM)
- WMD processes and tools
- Building Blocks notions of architecture and solutions
- Enterprise continuum and architecture repository
- Reference models of TOGAF®, TRM and IIRM

**Examen Inclus** : Inclus

**Duree Unite** : jour

**Duree Nombre : 2**  
**Reference : TOG-02**
