Cinema 4D – Motion Design

Description

This training will allow you to create complex procedural animations on Cinema 4D with confidence. Discover the power of the Mograph, its nodal editor and make animations for jingles, ads and social networks. Learn how to prepare your scene for import on After Effects.

Course Content

- Module 1: Using the Mograph
- Module 2: Cloners and Effectors
- Module 3: Matrix
- Module 4: Fracture
- Module 5: Moinstance
- Module 6: Motexte
- Module 7: Motreur
- Module 8: Mospline
- Module 9: Moextrude
- Module 10: Extruding Text
- Module 11: Text Animation
- Module 12: Scene Optimization
- Module 13: Export on After Effects

Documentation

- Digital courseware included

Participant profiles

- 3D artists
- Graphic artists
- Avanced multimedia creators wishing to add 3D content production to their skills

Prerequisites

- Very good knowledge of the computing environment
- Good knowledge of the software fundamentals

Objectives

- Create animations with the Mograph
- Know the different existing effectors
- Create text animations
- Export their scenes to After Effects via Cineware
