Master transversal leadership

Description

How to act to obtain the adhesion and the implication of the various actors without hierarchical link?

Beyond traditional hierarchical structures, the development of work in project mode, the piloting of networks or even the piloting of processes require specific strategies, methods and tools to develop the commitment and collaboration of a team without hierarchical link.

This is undoubtedly one of the biggest challenges for a Manager accustomed to manager in hierarchical mode. Developing your transversal leadership to convince, engage and generate collaboration requires revisiting your practices through contributions from neuroscience focused on collaboration and commitment.

Transversal leadership is an opportunity to rethink your position as a Manager and develop your skills in leading teams where the diversity of stakeholders is multiplied and where complexity becomes the norm.

How to generate engagement, inclusion and collaboration in a sustainable way and without hierarchical link? This training will bring you the keys to understanding transversal leadership, as well as methods, techniques and tools to develop your capacities to take up this challenge.
